

Safety note: Never attempt to inspect or perform maintenance on an underground stormwater facility; the providers listed below are trained and certified to perform confined space inspections and maintenance work.

The City of Washougal does not endorse or recommend any manufacturers or maintenance providers. This list is simply a directory of publicly available service providers that is updated annually.

The primary service maintenance providers perform is sediment removal from stormwater vaults, manholes, and catchbasins. Some provide additional stormwater services, please contact individual providers for details.
